Orion Fans Develops Speed Controllers To Reduce Energy Consumption & Costs

Distribution Date: May 19, 2016

Product Info: OA11/22 speed control units

Product Description: Low-cost OA11/22 dual channel phase control unit allows users to control fan speed for single or multiple AC fan assemblies

Key Markets/Applications: Well suited for medical, industrial, networking and telecom applications, the OA11/22 unit is designed for use with any AC fan or fan tray

Key Benefits:

- Low-cost
- Field adjustable
- Precisely control fan noise, speed and air delivery according to application requirements
- Four factory presets allows for maximum flexibility with minimum setup time
- Specially designed with fan trays and equipment racks in mind
- Limits noise
- Reduces energy consumption and cost

Product Specifications:

- 120/220 VAC
- Higher current options by special orders
- Four user adjustable speeds (off, low, medium and high)
- 2A input/output circuit breaker

Pricing: OA11/22 speed controllers start at \$162.50 in small quantities
